

## ELIMINATE YOUR PHONE SYSTEM HEADACHES

M5's Outsourced IP Phone System utilizes IP technology to eliminate a company's need to purchase, install, and maintain a premises-based phone system.

### Benefits of M5 Networks

- Extraordinary Service
- Simplified Vendor Management
- Improved Business Continuity
- Low Cost of Ownership
- Enhanced Productivity

What does M5 provide?

**Complete High End Business Phone System**

**Unlimited local and domestic long distance**

**Internet Service**

**Redundant Phone and Internet Access**

**Free Support**

**Outsourced IP Phone System**

## SECURI-TECH SOLUTIONS AND M5 DELIVER A NEW CLASS OF PHONE SYSTEM

### Why Outsource to M5?

When your company needs a phone system, does it make sense to select, buy, install and manage it yourself, or to find a company that has a track record of competently providing the service for other businesses? M5 clients receive experienced, customized, professional support and project management previously impossible with multiple vendors. M5 is the Northeast's leading outsourced IP phone system provider with 350+ New York area businesses that trust us with their communications. Each one has determined that M5 delivers a better, more reliable system than they could buy and run themselves.

### Never Invest in a Phone System Again

M5 provides a dramatically different way of satisfying your company's voice network needs.

### No Phone System Purchase

M5's outsourced IP phone system eliminates the need for a costly PBX, significantly lowering initial and recurring costs.

### Fixed Monthly Costs

M5's "flat monthly fee" means better cash flow management. With M5 there are no hidden fees, no maintenance bills and no charges for moves or changes.

### Consolidated Costs

M5 delivers voice and data over a single T1. Eliminating standard phone lines or separate voice T1s saves your company hundreds of

dollars per month.

### Lower Phone Bills

M5 provides unlimited local and long domestic calling as well as competitive international rates.

### Get a Fortune 500 Phone System

Since 2000, hundreds of businesses have replaced their existing inhouse phone systems with M5's outsourced IP solution. By partnering with M5, they have found a company they can trust that offers extraordinary service, particular features that can help their business, and great economics. Until recently this type of technology, used by many Fortune 500 companies, has been too expensive and unavailable for most small to mid-sized businesses.

### Stop Wasting Time with Phone Companies

M5 replaces the local and long distance companies, the phone system vendor, and the consultant that performs changes and upgrades. M5 focuses on being the best at one service: an outsourced, or hosted, VOIP phone system. Business owners, CTOs and CFOs turn to M5 to avoid buying or maintaining a phone system and the phone lines connected to it. As a single provider, M5 replaces the usual five telecom vendors and becomes accountable for reliability, highly responsive service, feature deployment, and predictable costs.

## PARTNER WITH YOUR TRUSTED ADVISOR

For the past 3 years, Securi-Tech Solutions has delivered proactive solutions and services that address the unique technology needs of various organizations. By enabling clients to leverage technology best practices and industry leading solutions, Securi-Tech Solutions allows users to concentrate on their core business and client service.

Working with M5, Securi-Tech Solutions extends business value for SMB's by providing them with the same IP telephony solutions typically only available to organizations twice their size. Our clients not only streamline their technology management by leveraging the M5-Securi-Tech Solutions relationship, they also benefit from simplified and reliable

telecommunications services and lower operational costs. Thus, they improve their productivity and the bottom line.
